## EXPLANATION

b born

f father

m mother

sb stillborn

The location of the birth record in DeKalb County Books is usually given on the same line as the infant's name or date of birth. As space would permit.

The place of birth can easily be found by the book number.

Auburn - book A25, A26, A27, A28 A29,  
A30, A31, A32, A60

Butler - book 9, 37, 41 (sometimes given with "B")

Garrett - books G20, G21, G22, G27, G28,  
G29, G32, G33, G34

Altona - book 29

St Joe - book 10

Waterloo - books W8, W38

rural / township - books 1, 2, 3, 4, 5, 6, 7, 31, 32, 33

These records are from file cards of the DeKalb County Health Department. The file cards seldom have the complete mother and father's names as given in the original Birth Records. Some errors may occur because of the poor writing of the records. Many that look as if they are errors, are not. The dates and differences in names and spelling often do appear in the DeKalb County Records.

Thanks to the Board of the DeKalb County Health Department for permission to copy the records. The only request was that all illegitimate births were not to be copied. This I have tried to do.

Special acknowledgement to Mrs Frances Kessler, of the Health Department. Without her co-operation, these records would not have been compiled. Thank you, Frances.

# NOTES

1. The first part of the paper discusses the importance of understanding the underlying mechanisms of the observed phenomena. This is crucial for developing effective interventions and policies.

2. The second part of the paper reviews the existing literature on this topic. It highlights the strengths and limitations of previous studies and identifies areas for further research.

3. The third part of the paper presents the results of the current study. The findings suggest that the proposed model is more effective than the existing ones in predicting the outcome of interest.

4. The fourth part of the paper discusses the implications of the findings for practice and policy. It suggests that the proposed model can be used to inform decision-making and to develop targeted interventions.

5. The fifth part of the paper concludes the paper and summarizes the main findings. It also provides some suggestions for future research.

6. The sixth part of the paper discusses the limitations of the current study. It acknowledges that the study has some limitations, such as the small sample size and the lack of control group.

7. The seventh part of the paper discusses the strengths of the current study. It highlights that the study has some strengths, such as the use of a novel model and the inclusion of a large number of variables.

8. The eighth part of the paper discusses the future research. It suggests that future research should focus on validating the proposed model in a larger sample and in a different context.

9. The ninth part of the paper discusses the conclusion. It concludes that the proposed model is a promising tool for predicting the outcome of interest and that it can be used to inform decision-making and to develop targeted interventions.

10. The tenth part of the paper discusses the acknowledgments. It acknowledges the support of the funding agency and the help of the research assistants.

1. The first part of the paper discusses the importance of maintaining accurate records of all transactions.

2. It then goes on to describe the various methods used to collect and analyze data.

3. The next section deals with the results of the study and the conclusions drawn from them.

4. Finally, the paper concludes with a discussion of the implications of the findings for future research.
